

Digital Info Technology (DIT) debuts the new & powerful Nimzy Vibro MAX that transform flat surface into a speaker. Be amazed!

Place the innocent looking cube on flat surface and be amazed at what it can do! Connected to any sound source, the Nimzy Vibro MAX turns the flat surface into a speaker.

Designed to go beyond conventional speaker technology, the Nimzy Vibro MAX uses an advance patented electro acoustic technology, projecting audio vibrations on to solid surface to produce sound. Crystal clear sound is produced through hard surface like wood, plastic or glass.

Integrating digital amplifier, volume control and on/off buttons all in one tiny cube, the Nimzy Vibro MAX is more powerful than any of its precedent. It comes with a handy slim remote control with adjustable bass, treble and volume.

Exuding an air of elegance, Nimzy Vibro MAX is aluminum alloy encrusted and is available in piano black.

#### The Technology Behind

Nimzy Vibro Max is composed of Giant Magnetostrictive material which is an alloy mainly composed of terbium, dysprosium and pure iron. It has the ability to generate great magnetostrictive force as they expand and contract under a magnetic field. When a magnetic field is applied, it provides proportional and repetitive expansion in microseconds.

When placed on hard surface such as wood, glass, plastic or acrylic, it projects the vibration to the surface to produce TRUE sound in any frequency.

## FEATURES

### *Omni directional sound*

Unlike conventional speakers, Nimzy Vibro MAX lets you listen to music or sound from all direction.

### *Integrated Functions*

Nimzy Vibro MAX is integrated with digital amplifier, volume controller and on/off buttons all in one.

### *More is beautiful*

To make life easier, there is the card sized remote controller that allows you to adjust the bass, treble and volume according to your liking.

### *Highly portable*

With its compact size, you can bring music everywhere you go. Just place Nimzy Vibro MAX on any hard surface.

### *Ease of usage*

Connect Nimzy Vibro MAX to audio sources like Laptop, PC, MP3 or CD, place it on any hard surface and be engulfed in crystal clear music!

## APPLICATIONS

With its portability, Nimzy Vibro MAX can be used in many locations. Be it a presentation in the conference room or simply playing your favourite music in the living room.

### **Specifications for Nimzy Vibro MAX:**

Impedance	4 Ohms
Frequency Range	100 Hz - 20,000 KHz
Sensitivity	91 db/m/W
Rated power	20W (RMS)
Measurement	60(L) x 60(W) x 50(H) mm
Weight	550g
