## **Nimzy ProtoKey hides, protects and secures your important data from unsolicited viewing.**

Nimzy ProtoKey is a smart and reliable device that hides your files and information making them invisible and untraceable. And only with this ProtoKey, you are able to retrieve the hidden information.

Unlike USB flash drives or portable hard disks, Nimzy ProtoKey is not a storage device and does not store information. It not only encrypts but also hides information that is stored in these portable devices which are highly susceptible to loss or being stolen.

Nimzy ProtoKey allows user to hide all sensitive data stored in hard drive as well, protecting the privacy of your work from being viewed or extracted.

### **How It Works**

#### **Hide Files and Folders**

Enable user to create files and folders on the hard drive or any other external storage devices. When Nimzy ProtoKey is removed, the secured files and folders became completely undetectable. Keeping the files and folders invisible, it effectively secures all your documents with reliable protection, while at the same time, easy and fast to work with.

#### **The hardware**

Using advance ASIC (Application Specific Integrated Circuit) technology, it converts the software program and code into the hardware itself. This makes Nimzy ProtoKey more secured and tough to hack.

#### **The difference**

Nimzy ProtoKey not only encrypts but also makes files and folders invisible miraculously. Tracking the same file is made possible only with the same ProtoKey.

### **Main Features:**

#### **Hides, Protects and Secures important files and folders from unsolicited viewing**

Files and folders are secured and made INVISIBLE to other users of the same PC. This protects your personal or corporate data from being viewed, accessed or extracted.

#### **Secures Data that are stored in removeable devices**

Data stored in removeable devices are secured even if they are lost or stolen.

---

### **High Security**

Feel secure even when the PC is left unattended.

### **Plug-and-play convenience**

Easy and user friendly plug-and-play feature. No special training effort needed.

### **Additional Feature:**

#### **Secured Internet Access**

Nimzy ProtoKey enables user the full control over the use of internet. This provides user the choice and flexibility in pre-programming the starting and ending time for accessing the internet.

- Parents can now restrict their children's time in accessing the internet.
- Company can control the time staffs spend on internet. e.g., cutting off internet access after office hour.

With this flexibility, it also reduces the risk and provides more security against internet hacking. You can now be sure that your information is securely protected.
