

VB Ball

Explorner Pte Ltd debuts the new & latest VB Ball that transform flat surface into a speaker. Come in 4 different colours as shown below:

Black Colour

Grey Colour

White Colour

Silver Colour

Place the innocent looking VB Ball on flat surface and be amazed at what it can do! Connected to any sound source be it MP3 player, laptops, handphone, the VB Ball turns the flat surface into a speaker without having to connect a single wire.

You will enjoy the splendid sound effect from different materials. Try different furniture material of your table, cabinet, glass and turn it into huge speaker. You can adjust the volume with the new rotating button as shown on the right.

New Amplifier with its unique rotating button for volume adjustment

Designed to go beyond conventional speaker technology, the VB Ball uses an advance patented electro acoustic technology, projecting audio vibrations on to solid surface to produce sound. Crystal clear sound is produced through hard surface like wood, plastic or glass.

The Technology Behind

VB Ball is composed of Giant Magnetostrictive material which is an alloy mainly composed of terbium, dysprosium and pure iron. It has the ability to generate great magnetostrictive force as they expand and contract under a magnetic field. When a magnetic field is applied, it provides proportional and repetitive expansion in microseconds. When placed on hard surface such as wood, glass, plastic or acrylic, it projects the vibration to the surface to produce TRUE sound in any frequency.

Specifications for VB Ball:

Power out	18W (RMS)
Frequency Range	100 Hz - 12 Khz
Sensitivity	85 db/m/w
Nominal Impedance	8 Ohms±0.2
Core Driver Size (mm) Diameter	66 mm
Weight	850g
Core Driver Net Weight (grams)	550g
Power Adaptor I/P	AC 100-240V 50/60Hz 0.3A O/P:DC15V 1A

Supplied Accessories

Audio input Cable	1 each
Audio output wire from source (3.5 mm jack---2.5mm jack)	1 each
User Manual/ Warranty Card	1 each
Packaging box (cm) 16(W)x 16(D) x11(H) cm	1 each
Full Set Product Net Weight	0.8kgs
Revolving Audio amplifier	1 each
Colour light-gray	Black, white, silver, grey
